

# One View Connect

Achieve one uniform view of your global payroll with One View Connect.

One View Connect was designed as a global-first payroll solution allowing for flexibility in payroll processing, while giving one consolidated view into the cost of your organisation's workforce — in a single currency. Gain access to the metrics that matter and a suite of reports that allow your business to better understand, manage, and respond to the cost associated with paying employees.

## Gain actionable insights

- Simply provide existing gross-to-nets, and One View Connect will take it from there. Gain deep insight into payroll distribution trends, variances, and outliers based on the payroll you have just run to make strategic decisions for your business.

## Exceptional Employee Experience

- Provide a consistent employee experience for all employees across the globe, no matter how their payroll is processed or by whom. One View provides deep data insights into the payslip for all employees in all geographies via the Mobile Native app.

## Maintain full control

- If you are happy with your payroll processing in any country or multiple countries or have a large team paid in any locations from your core HCM, no problem. We can deliver centralised reporting under one roof for your entire employee population.

## Deliver aligned GL integration

- Struggling to deliver consolidated financial reporting from disparate systems or providers into your finance ecosystem? Let One View Connect deliver fully balanced general ledger data directly into your Financial Management System.

## Speed to Value

- Implement in a matter of weeks, gaining global visibility into your payroll data and begin realising the value and benefits of true multi-national payroll in a fraction of the time of a full global payroll transformation.
