

# One View Managed Services

Unify and streamline multi-country payroll with One View Managed Services.

One View Managed Services provides secure and compliant payroll, enabling global organisations to modernise and reimagine the traditionally fragmented, costly, and cumbersome global payroll model. One View shifts global payroll from a back-office administrative function to a key resource contributing to business planning and functional improvements. Available in 160+ countries worldwide.

## Centralised payroll management and country-specific views

- One View enables you to centralise all international payroll management, providing a single source of global payroll truth while still being able to drill into individual country statuses.

## Real-time global oversight

- Access a single dashboard that gives a consolidated view of global payroll processing, allowing you to see the completion rates of payroll processing in each country of operation.

## Perpetual validation

- Uses artificial intelligence and robotic process automation to identify errors ahead of time, buying back time into your payroll calendar and allowing your payroll team to focus on more strategic projects.

## User-Centric Interface

- Experience an intuitive, process-driven user interface. Easily click through the stages of the payroll cycle with the ability for administrators to set up and make changes directly through the platform.

## Payroll process automation

- Gain time back across the entire end-to-end payroll cycle with automation of inputs, information validation, and payments, allowing you to benefit from later payroll close and accuracy of payment delivery.

## Legislative updates built-in

- Country-specific information functionality means all data points required are fully managed within the system.

## Payroll completion accuracy and success

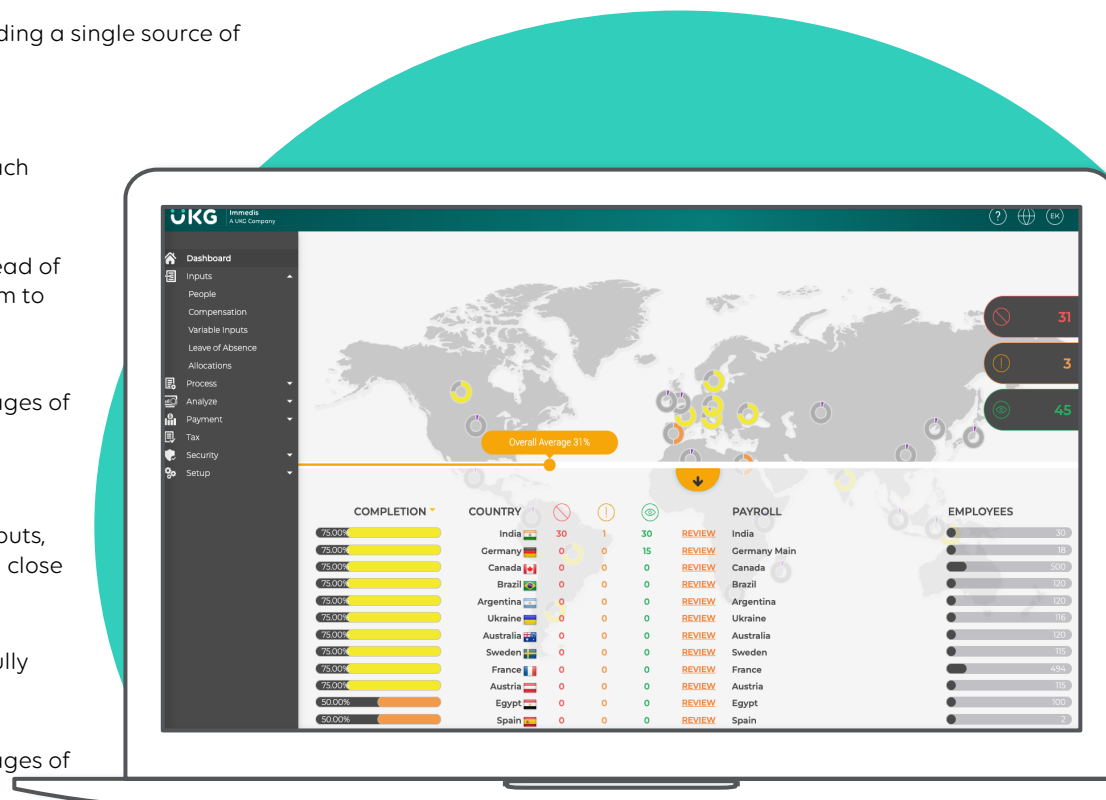

- Experience an intuitive, process-driven user interface. Easily click through the stages of the payroll cycle with the ability for administrators to set up and make changes directly through the platform.

## Localisation and language packs

- Improve overall user and employee experience with access to multiple language options.

## Enhanced employee self-serve

- One View devolves payroll administrative tasks such as payslip access and bank details maintenance, giving control back to the employee, and removing manual effort from Payroll and HR teams..
