

# One View Payments

Automate the final, critical stage in the payroll process with One View Payments.

Enable funding employee and third parties in-country from one single or regionally funded accounts while saving banking fees and dramatically reducing the time to process. Remove the burden of manually funding payments from finance teams and ensure ultimate compliance and accuracy.

## Access one centralised, compliant payments hub

One View Payments uses existing banking and payment partner integrations to deliver transactions to 160 countries globally in over 150 different currencies where local payroll regulation allows us to make payments on behalf of our clients. You can feel confident that local banking and payment requirements are covered while avoiding the additional costs associated with payment transfers. One View's network of local in-country automated clearing houses (ACH) ensures full and timely payment delivery.

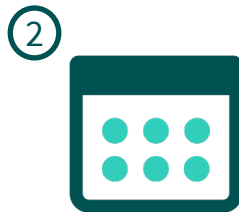

Payday doesn't stop when payroll is approved. To employees, payroll equates to their pay being deposited into their accounts.

## 4 steps to optimise your global payments:

### APPROVAL

Organisation approves payroll

### PAYMENTS BOOKING

One View books payments and initiates funding

### FUNDS PULLED

Funds are pulled from the specified business account

### PAYMENTS SENT

One View sends payments to employees, tax authorities, and statutory third parties
